Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3, 5-8, 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 1-3, 5-8, 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: the structure that comprises a wrench. Whereas the preamble discloses a wrench, the body of the claim does not disclose the features that could be characterized as a wrench.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3723

5. **Claims 1, 2, 3, 5-8, 10 and 11** are rejected under 35 U.S.C. 102(e) as being anticipated by Sowry et al. 516.

Referring to claims 1, 3, 5, 6, 8, and 10, Sowry discloses a tool comprising: a first engagement comprising an engagement region (12) and a second engagement region (opposite end), the body positioned adjacent to the first engagement end, the body incorporating a reflective material (20), and a second engagement end having a second engagement region, the second engagement end positioned adjacent to the body and opposite the first engagement end; an engagement end having an engagement region (12); and a body positioned adjacent to the engagement end; the body incorporating a reflective material (20) the reflective material is positioned on the body to reflect light from a light source; and the reflective material includes a luminescent material (column 2, lines 58-61). In lines 18-21 of column 2, Sowry et al. discloses the reflective material may be applied over any hand tool including a wrench.

Referring to claims 2 and 7, Sowry et al. discloses that the tool is buoyant which means that the specific gravity has to be less than 1.0 in order for the tool to float (see also Fig. 3).

Referring to claim 11, Sowry et al. discloses a method of forming a buoyant wrench (column 2, lines 18- 22), including the steps of: positioning an engagement end having an engagement region adjacent to a body, and incorporating a reflective material in the body.
